## 1 – INTRODUCTION

The Department of Municipal Affairs, on behalf of the Nova Scotia Government and Association of Municipal Administrators of Nova Scotia (AMANS), compiles municipal indicators that focus on financial matters, administration of the municipality and characteristics of the community.

Prior to 2017, this information was structured into two separate reports – the Financial Condition Indicator and the Municipal Profile reports. This report brings together both sets of statistics (financial and demographic) to give an overall snapshot for each municipality.

You can use this report to:

- help community members better understand the municipality in which they live
- better understand the key characteristics about the municipality
- better understand financial risks, and
- help inform the decision-making process

### For example

Council and Community members can:

- compare the Three-Year Change in Tax Base indicator to understand the municipality's revenue growth in comparison to cost of living, and
- use the change in population to understand whether their community's population is growing or declining and potential impact on municipal revenues and expenses.

## 2 – MUNICIPAL HIGHLIGHTS

### 2.1 General Information About the Municipality

The Town of Clark's Harbour ("the Municipality") is a town located in Shelburne County. It is approximately 3km<sup>2</sup> with 414 dwellings.

### 2.2 Population Highlights

From 2011 to 2016, the population of Shelburne County decreased by 3.7%. Similarly, the population of the Town of Clark's Harbour decreased by 7.3%. The Municipality's population is aging: currently, 54% of residents are between 20 and 59 years of age.

## 2.3 Financial Highlights

# \$1.1 M

## 2018 General Operating Budget

General Operating Revenue Sources per 2018 Financial Information Return <sup>1</sup>

The total generating operating revenue for 2017-18 was \$1.1 million. The Town of Clark's Harbour is self-financing, deriving most of their revenue from own source revenue instruments. As shown in the pie chart above, revenue sources for Clark's Harbour are comprised of:

- ◆ 0.9 million (76%) Net property taxes and payments in lieu of taxes
- ◆ 0.2 million (17%) Unconditional transfers from other governments
- ◆ 0.0 million (4%) Other revenue from own sources
- ◆ 0.0 million (3%) Grants in lieu of taxes
- ◆ 0.0 million (0%) Conditional transfers from other governments
- ◆ 0.0 million (0%) Services provided to other governments
- ◆ 0.0 million (0%) Sales of services

<sup>1</sup> Municipalities submit the Financial Information Return (FIR) to the Department of Municipal Affairs annually and this report contains financial information for the year ended March 31, 2018.

## General Operating Expense Categories per 2018 Financial Information Return

The total generating operating expenses for 2017-18 was \$1.0 million. As shown in the pie chart above, expenses for Clark's Harbour are comprised of:

- ◆ 0.3 million (30%) General government services
- ◆ 0.3 million (27%) Environmental health services
- ◆ 0.2 million (21%) Protective services
- ◆ 0.1 million (11%) Recreation and cultural services
- ◆ 0.1 million (9%) Transportation services
- ◆ 0.0 million (2%) Environmental development services
- ◆ 0.0 million (0%) Public health services
- ◆ 0.0 million (0%) Extraordinary or special items

## 2.4 Financial Condition Indicators

The Financial Condition Indicators (FCIs) were developed to help present a sense of municipal financial information by condensing multiple sources of information into a single 'House Format' graph. This visual focuses on key performance indicators, leading financial indicators and potential internal and external factors that could have an impact on a municipality's financial results. The House Model on the next page presents 13 indicators organized into three dimensions: base, structure and roof.

Each of a municipality's indicators is assessed against risk thresholds: low risk (green), moderate risk (yellow) and high risk (red). This provides a quick visual of a municipality's strengths and possible areas where a municipality may want to focus its attention.

The Town of Clark's Harbour has nine indicators assessed as low risk (well within the recommended threshold), three indicators assessed as moderate risk, and one indicator assessed as high risk.

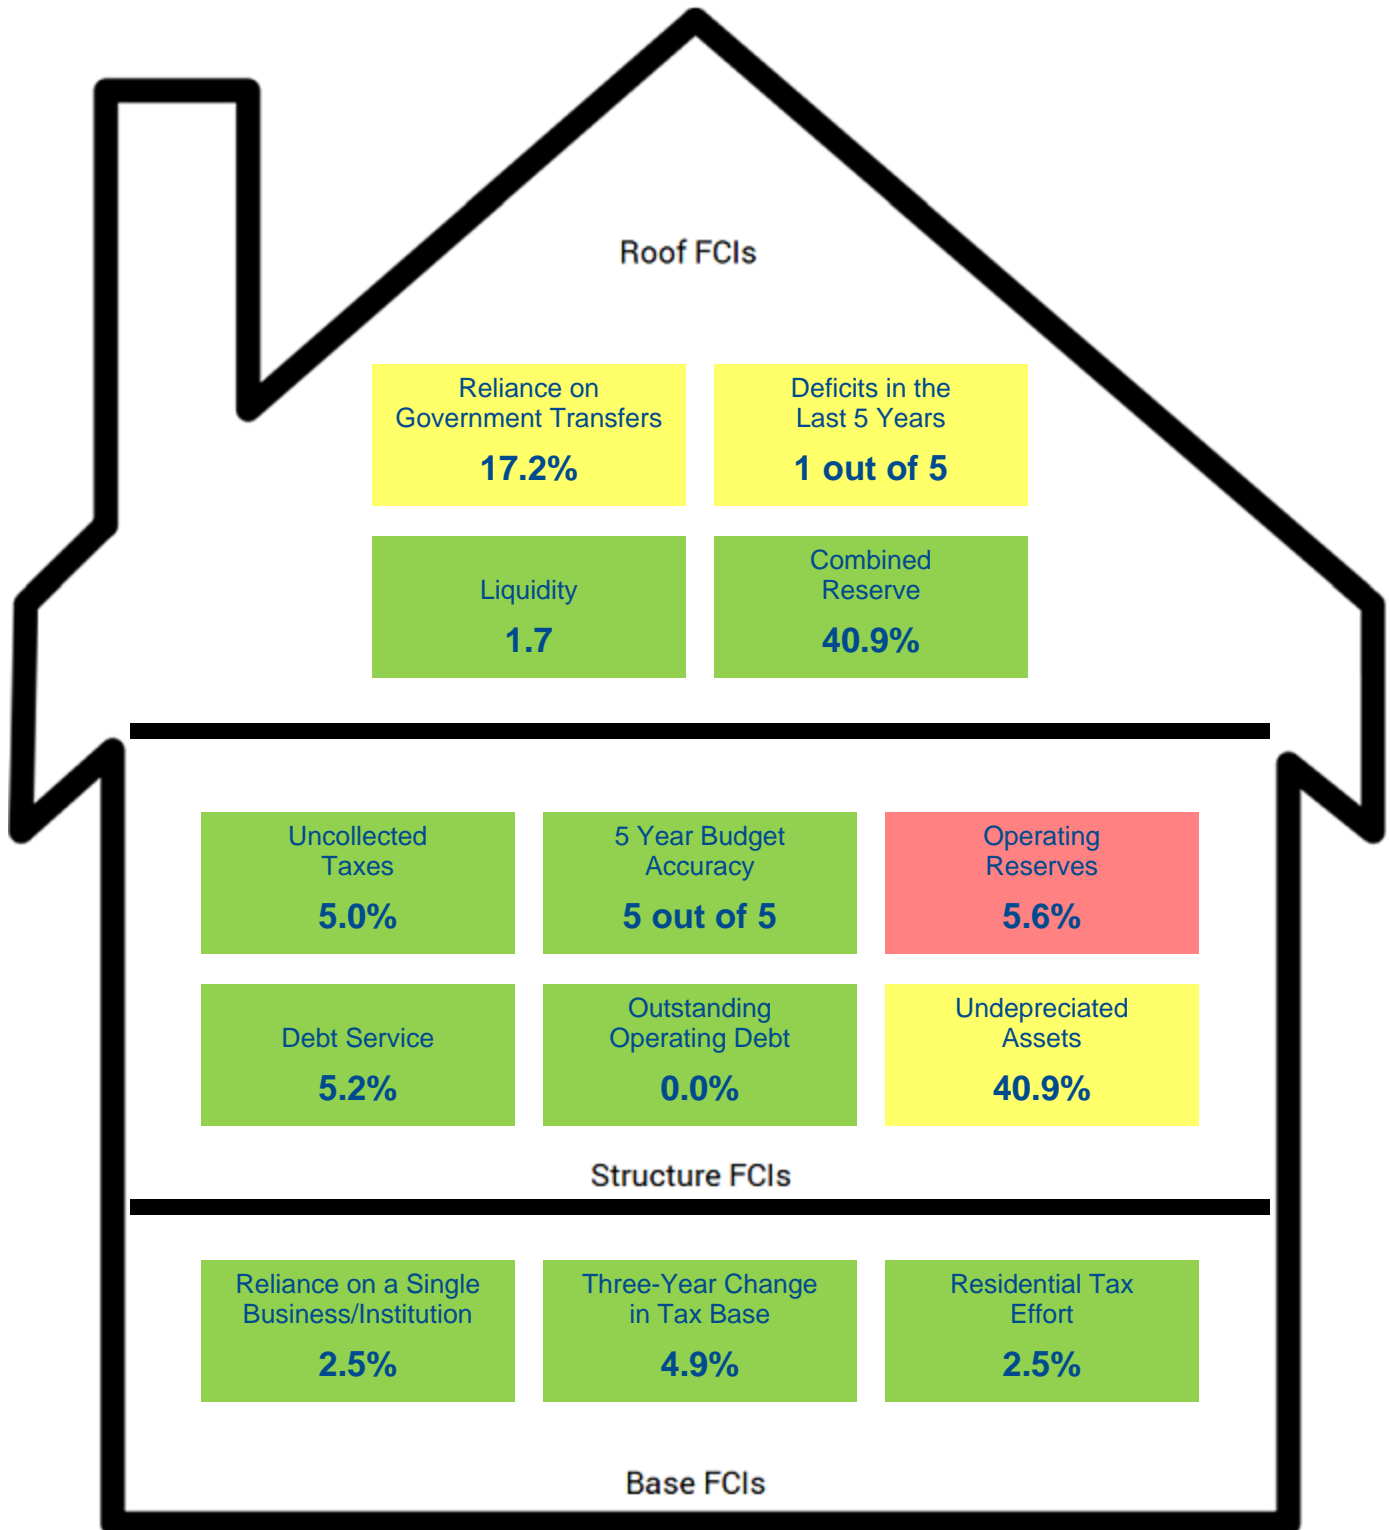

Reviewing the combined FCIs, the Department calculates an overall assessment for fiscal instability:

- High-risk (7 or less FCIs meets threshold)
- Moderate-risk (8-9 FCIs meets threshold)
- Low-risk (10-13 FCIs meets threshold)

The overall Financial Conditions Index assessment for the Town of Clark's Harbour is yellow (moderate risk). This means that the Municipality has a few challenges, and it is considered moderate risk for fiscal instability. Although, the Financial Condition Indicators are one tool, they serve as an early warning of potential risks and the need for additional inquiry and/or actions. It is important the Municipality assess their risks in relation to future actions and mitigating factors.

The following pages provide details on the individual FCI assessments and the Municipality's specific challenges. For more in-depth information on the FCIs, please refer to Section 5.

### 2.4.1 Financial Condition Indicators in House Format

## 2.4.2 Two-Year Comparison of Financial Condition Indicators

| <b>BASE</b>                                  | <b>2018</b>   | <b>2017</b>   | <b>+/-</b> | <b>2018 Town Avg.</b> |

## 3 – MUNICIPAL PROFILE INFORMATION

Municipalities are diverse and operate within unique demographic and economic characteristics. These characteristics have a significant impact on municipal performance and subsequent strategies required to ensure a sustainable environment. This chapter outlines the unique demographic and economic characteristics of the Municipality, specifically its composition, population trends, demographics, median household income levels, employment rates, and educational attainment.

### 3.1 Municipal Composition

Located in Shelburne County, the Town of Clark's Harbour is a town<sup>2</sup> with seven elected councillors, including the Mayor.

In geographic area, the Municipality is approximately 3km<sup>2</sup> with 414 dwellings.

### 3.2 Population Trends

The Town of Clark's Harbour's population is 760, which makes up 0.1% of the provincial population. The graph below shows Clark's Harbour's 20-year trend compared to the provincial town average. The population of Clark's Harbour has been declining.

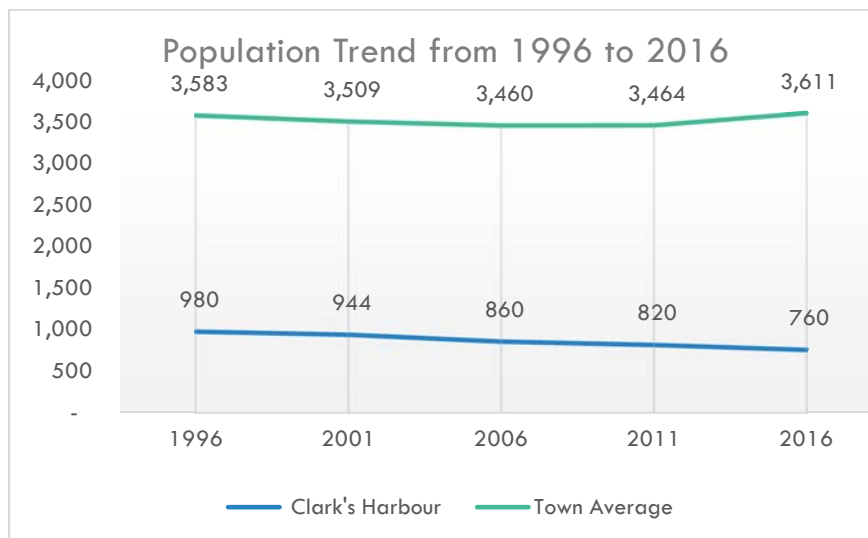

Figure 1 - Population from 1996-2016. Source: Statistics Canada.

<sup>2</sup> There are three categories of municipalities: regionals, towns and rurals. Rural municipalities are counties or districts.

Figure 2 shows Clark’s Harbour’s population is aging.

Figure 2 - Comparison of Population by Age for 2011 and 2016. Source: Statistics Canada.

According to the 2016 Census, similar to most towns in Nova Scotia, the majority of Clark’s Harbour’s citizens are between the ages of 40 and 69.

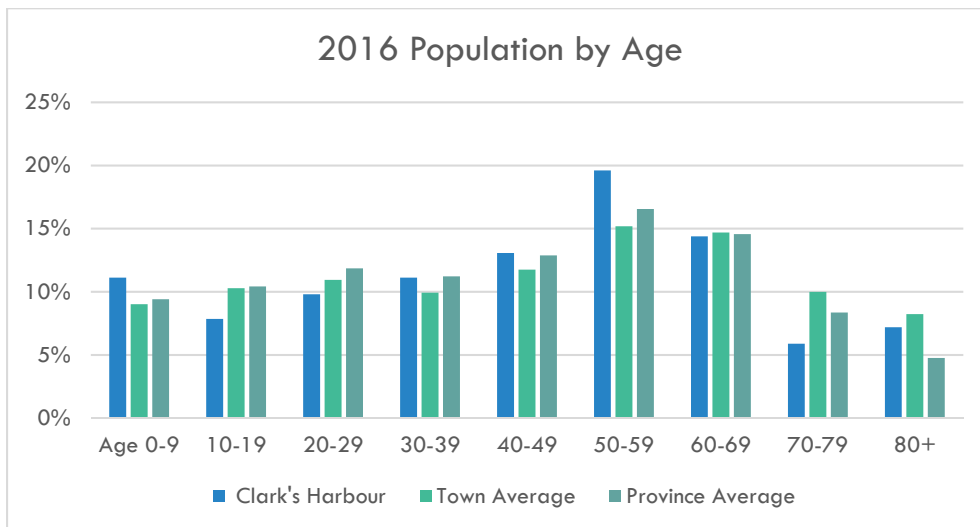

Figure 3 - 2016 Population by Age. Source: Statistics Canada.

These population trends could have impacts on the current and potential future tax base for the Town of Clark’s Harbour, as 76% of Clark’s Harbour’s General Operating Revenue is derived from property taxes.

### 3.3 Economic Indicators

Along with population trends, it is important to understand employment rates and median household income. Education levels can also play a crucial role in economic and social progress and can help improve income distribution. These factors can provide an indication of the well-being of the economy and labour force.

|                                     | 2016<br>Census | 2011<br>Census | +/-     | 2016<br>Town<br>Avg. |
|-------------------------------------|----------------|----------------|---------|----------------------|
| <b>Median Household Income</b>      | \$53,120       | \$48,102       | \$5,018 | \$48,934             |
| <b>Employment Rate</b>              | 59.4%          | 34.2%          | 25.2%   | 48.3%                |
| <b>Education Beyond High School</b> | 35.1%          | 22.1%          | 13.0%   | 52.0%                |

*Source: 2011 and 2016 Statistics Canada Census*

In a healthy economy, the unemployment rate is between 3% and 5%. The Town of Clark's Harbour's employment rate is above the provincial town average and it has increased since 2011.

Clark's Harbour's education level is lower than the provincial town average, although it has increased since 2011.

Clark's Harbour's median household income is higher than the provincial town average and has increased since 2011.

## 4 – FINANCIAL INFORMATION

### 4.1 Revenue

Audited financial statements are presented on a consolidated basis. Consolidated financial statements are comprised of all the individual funds managed by the municipality and any organization or enterprise the municipality owns or controls. Consolidated financial statements reflect all these entities as one single reporting entity.

The municipality's non-consolidated financial statements<sup>3</sup> present only the individual funds managed by the municipality such as the General Operating Fund, General Capital Fund, Water Operating Fund, Water Capital Fund, Non-operating Reserve Fund, and the Operating Reserve Fund.

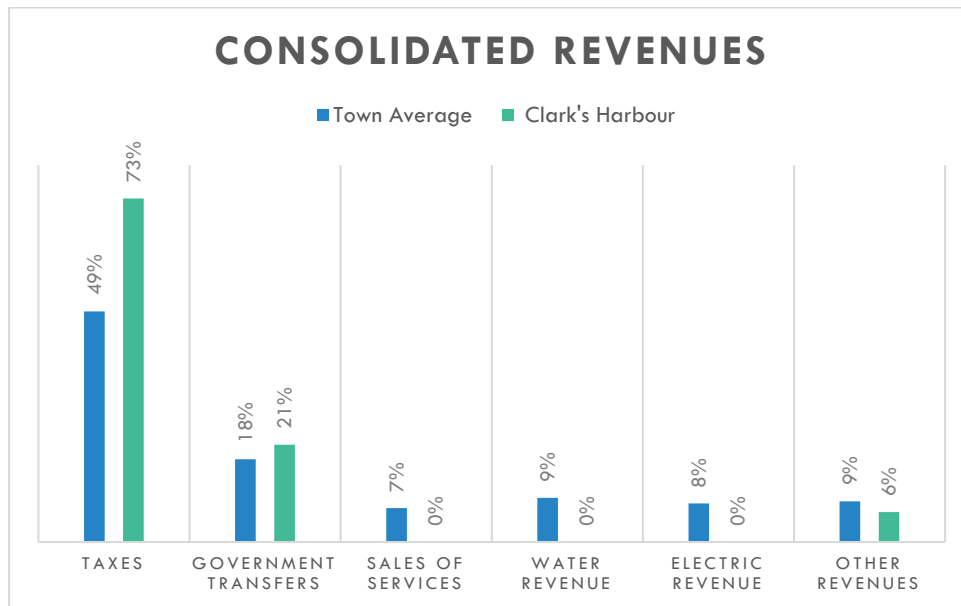

As per the Consolidated Financial Statements of the Town of Clark's Harbour, the Municipality has no other organizations or enterprises.

Clark's Harbour's total consolidated revenue including those entities for 2017-18 was \$1.2 million.

<sup>3</sup> Please be advised that, although the Department reconciles, at a high level, a municipality's non-consolidated financial statements to the consolidated financial statements, the non-consolidated financial statements are usually not audited nor presented in full accordance with Canadian public sector accounting standards.

As shown in graph below, the Municipality's revenue is divided into five categories on a consolidated basis and is compared to the provincial town average.

To fund its expenditure responsibilities, the Town of Clark's Harbour relies on taxes for 73% of its revenue. In 2018, 79%<sup>4</sup> of municipal revenues was generated from Clark's Harbour's own sources, while 21%<sup>5</sup> was dependent on transfers from other levels of government.

<sup>4</sup> Including Taxes, Sales of Services, Water (if applicable), and Other Revenues. Sales of Services include all sales of services provided to individuals, businesses and other governments. Other Revenues include grants in lieu of taxes, other revenues from own sources and net income from government business enterprises.

<sup>5</sup> Including unconditional and conditional transfers from federal, provincial and other local governments for municipal operations and capital infrastructure projects.

The graph below shows the Municipality’s revenue from municipal operations only or from the Municipal General Operating Fund.

A municipality's ability to raise revenue through property tax is dependent on its taxable assessment base. Since property taxes are a primary source of revenue for most municipalities, special emphasis has been placed on reviewing assessment trends. The line graph below shows residential and commercial trends for the last five years.

Based on 2018 Financial Condition Indicators related to municipal revenues, the Municipality's general operating revenue is stable. The Town of Clark's Harbour's tax assessment growth is above the Consumer Price Index (CPI). This indicates that the Municipality's tax base was able to cover the increasing cost of municipal services and programs.

- Since the Municipality's tax base is not dependent on one single business or institution, it is not showing a vulnerability in this area.
- The Residential Tax Effort Indicator, which can assess the affordability of the Municipality's taxes in relation to the current service levels, indicates that the Municipality has some flexibility to increase the taxes if required.
- The Municipality is managing tax revenue collection.

## 4.2 Expenses

Total consolidated expenses were \$1.2 million. Environmental Health service expenses make up 27% of total expenses. Environmental Health service expenses consist of Sewage, Garbage and Waste Collection and Disposal services provided by the Municipality.

Please note Other Expenses include Environmental Development Services, Recreation and Cultural Services, Public Health Services (if applicable) and Extraordinary or Special Items.

The graph below shows the Town of Clark’s Harbour’s expense by function on a consolidated basis compared to the provincial town average.

The graph below shows the expenses by function for the municipal operations or General Operating Fund expenses compared to the provincial town average.

Based on the indicators related to municipal general operating expenses, the results show:

- The Municipality consistently maintained its expenditures within the budget limits.
- For four of the last five years, the Municipality has been able to meet its needs in a balanced manner and has maintained a balanced budget. In 2015, the Municipality experienced approximately 9.7k deficit.

## 5 – FINANCIAL CONDITION INDICATORS

The Financial Condition Indicators (FCIs)<sup>6</sup> were developed jointly by the Province of Nova Scotia, the Nova Scotia Federation of Municipalities (NSFM), and the Association of Municipal Administrators (AMA) to help present municipal financial information by condensing multiple sources of information into a single visual graph. This visual focuses on key performance indicators, leading financial indicators and potential internal and external factors that could have an impact on a municipality's financial results. The House Model below presents 13 Indicators organized into three dimensions: base, structure and roof.

<sup>6</sup> FCIs are based on non-consolidated data.

Each of a municipality's indicators is assessed against risk thresholds: low risk (green), moderate risk (yellow) and high risk (red). This provides a quick visual of a municipality's strengths and possible areas where a municipality may want to focus its attention. The Town of Clark's Harbour has nine indicators assessed at low risk (well within the recommended threshold), three indicators assessed at moderate risk and one indicator assessed at high risk.

Before you can understand a municipality's situation, it is important to understand what the indicator is measuring and the potential risks identified. For example: for a municipality with a three-year change in tax base lower than the threshold, this could indicate that assessments are growing slower than inflation. A negative percentage for this indicator indicates a decrease in assessment value, which could indicate serious economic concerns in the region.

Please note that FCI results serve as an analytical tool to help identify the need for additional inquiry and/or action. Reviewing the direction, the FCI is moving can serve as an early warning. Assessing the results in relation to strategic decisions can also help an individual understand risk tolerance and potential mitigating factors.

It is important to understand that reaching or exceeding a threshold does not necessarily mean a municipality is in danger. The red colour indicates that a high risk has been identified. When this occurs, it is critical that this indicator is reviewed, along with additional inquiry or analysis. The additional analysis needs to consider mitigating factors that are causing the trend or other factors that could help neutralize the risk.

The next section provides more in-depth information.

## The Base FCI Indicators

### Reliance on a Single Business/Institution

| Calculation  | Risk Thresholds |                  |
|--|-----------------|------------------|
| <u>Taxable assessment value of the largest business or institution</u><br>Uniform Assessment | Low             | Less than 10%    |
|  | Moderate        | 10% to 15%       |
|  | High            | Greater than 15% |

**2018 Results:** The largest single commercial or institutional account is only 2.5% of the Municipality's total Uniform Assessment. Assessed as a low risk.

**What does it mean?** The Municipality's tax base is not dependent on one single business or institution. The Municipality is not showing vulnerability in this area.

### Three Year Change in Tax Base

| Calculation  | Risk Thresholds |   |
|--|-----------------|---|
| <u>Current Uniform Assessment-Uniform Assessment 3 Years Prior</u><br>Uniform Assessment 3 Years Prior | Low             | Equal or above CPI % Change                 |
|  | Moderate        | Below CPI % Change, but not negative growth |
|  | High            | Negative growth                             |

**2018 Results:** 4.9% growth, above the CPI % change (4.4%). Assessed as a low risk.

**What does it mean?** Growth is above the CPI % change. The Municipality's tax base is strong to cover the cost of municipal services and programs.

### Residential Tax Effort

| Calculation   | Risk Thresholds |                 |
|---|-----------------|-----------------|
| <u>Total residential tax revenue per dwelling unit</u><br>Median Household Income | Low             | Less than 4%    |
|   | Moderate        | 4% to 6%        |
|   | High            | Greater than 6% |

**2018 Results:** 2.5% of median household income is required to pay the average tax bill. Assessed at a low risk.

**What does it mean?** This Indicator enables the Council to assess the affordability of the Municipality's taxes in relation to the current service levels. This result shows the Municipality has some flexibility to increase the taxes if required.

## The Structure FCI Indicators –Management Dimension

### Uncollected Taxes

| Calculation  | Risk Thresholds |                  |
|--|-----------------|------------------|
| $\frac{\text{Total Cumulative Uncollected Taxes}}{\text{Total Taxes Billed in Current Fiscal Year}}$ | Low             | Less than 10%    |
|  | Moderate        | 10% to 15%       |
|  | High            | Greater than 15% |

**2018 Results:** 5.0% Assessed as a low risk.

**What does it mean?** The Municipality is effectively managing their tax revenue collection.

### Undepreciated Assets

| Calculation  | Risk Thresholds |                  |
|--|-----------------|------------------|
| $\frac{\text{Total Net Book Value of Capital Assets}}{\text{Gross Costs of Capital Assets}}$ | Low             | Greater than 50% |
|  | Moderate        | 35% to 50%       |
|  | High            | Less than 35%    |

**2018 Results:** 40.9% Assessed as a moderate risk.

**What does it mean?** Municipalities across Canada are facing sufficient infrastructure challenges. This indicator estimate 40.9% of useful life is remaining in the municipality's capital assets. Like a significant number of municipalities, this Municipality is experiencing a potential growing infrastructure gap.

### 5 Year Budget Accuracy

| Calculation  | Risk Thresholds |   |
|--|-----------------|---|
| $\frac{\text{Total budget expenditures}-\text{Total actual expenditures}}{\text{Total budget expenditures}}$ | Low             | 5 out of 5 years, expenditures within +/- 5% or expenditure and revenue variances within +/- 5% of each other |
|  | Moderate        | 4 out of 5 years, expenditures within +/- 5%  |
|  | High            | Less than 4 out of 5 years, expenditures within +/- 5%  |

**2018 Results:** For the last 5 years, the Municipality's actual expenditures were within +/- 5% of budget. Assessed at a low risk.

**What does it mean?** For the last five years, the Municipality consistently maintained their expenditure spending within the budget limits. This should instill confidence in the budget/expenditure management process.

## The Structure FCI Indicators – Debt and Reserves

### Debt Service

| Calculation  | Risk Thresholds |                  |
|--|-----------------|------------------|
| $\frac{\text{Principal and Interest Paid on Long-term Debt}}{\text{Total Own Source Operating Revenue}}$ | Low             | Less than 10%    |
|  | Moderate        | 10% to 15%       |
|  | High            | Greater than 15% |

**2018 Results:** 5.2% Assessed as a low risk.

**What does it mean?** Only 5.2% of the Municipality's revenue is spent on principal and interest payments. Provided the Municipality has adequate cash flow, it appears the Municipality may have flexibility to increase borrowing levels to help finance future capital expenditures.

### Outstanding Operating Debt

| Calculation   | Risk Thresholds |                  |
|---|-----------------|------------------|
| $\frac{\text{Total Outstanding Operating Debt}}{\text{Total Own Source Revenue}}$ | Low             | Less than 25%    |
|   | Moderate        | 25% to 50%       |
|   | High            | Greater than 50% |

**2018 Results:** 0.0% Assessed as low risk.

**What does it mean?** The Municipality is not carrying operating debt.

### Operating Reserve

| Calculation   | Risk Thresholds |                  |
|---|-----------------|------------------|
| $\frac{\text{Total Operating Reserve Fund Balance}}{\text{Total Operating Expenditures}}$ | Low             | Greater than 20% |
|   | Moderate        | 10% to 20%       |
|   | High            | Less than 10%    |

**2018 Results:** 5.6% Assessed as a high risk.

**What does it mean?** This Indicator provides the value of funds set aside for planned future needs, to smooth expenses or for unexpected expenses. This result indicates the Municipality is not setting aside sufficient funds to help mitigate any unforeseen risks or future need.

**FCI- Key Performance Indicators- the ability to meet current and future needs in a  
balanced and independent manner**

**Reliance on Government Transfers**

| Calculation  | Risk Thresholds |                  |
|--|-----------------|------------------|
| $\frac{\text{Total Government Transfers}}{\text{Total Revenue}}$ | Low             | Less than 15%    |
|  | Moderate        | 15% to 20%       |
|  | High            | Greater than 20% |

**2018 Results:** 17.2% Assessed as a moderate risk.

**What does it mean?** This Indicator indicates that 17.2 % of the Municipality's operating revenue is obtained another level of government.

**Number of Deficits in the Last 5 Years**

| Calculation  | Risk Thresholds |  |
|--|-----------------|--|
| The number of non-consolidated operating deficits<br>in the last five years. | Low             | None in the last 5 years   |
|  | Moderate        | One or more in the last 5 years  |
|  | High            | One or more in the last 2 years with one material (0.5% of operating expenses) |

**2018 Results:** One in the last five years. Assessed as a moderate risk.

**What does it mean?** Deficits are important indication of financial health and a municipality's ability to maintain a balance budget. This result indicates the Municipality has experienced one deficit in the last five years. In 2015, the Municipality experienced approximately 9.7k deficit.

**Liquidity**

| Calculation  | Risk Thresholds |                  |
|--|-----------------|------------------|
| $\frac{\text{Total Current Financial Assets}}{\text{Total Current Liabilities}}$ | Low             | Greater than 1.5 |
|  | Moderate        | 1 to 1.5         |
|  | High            | Less than 1      |

**2018 Results:** 1.7 Assessed as a low risk.

**What does it mean?** Liquidity is key to financial performance. This result indicates the Municipality does not have a cash flow problem and is able to meet their service obligations.

### Combined Reserves

| Calculation   | Risk Thresholds |                  |
|---|-----------------|------------------|
| <u>Total Operating and Capital Reserves</u><br>Total Operating Expenses plus Amortization Expense | Low             | Greater than 40% |
|   | Moderate        | 30% to 40%       |
|   | High            | Less than 30%    |

**2018 Results:** 40.9% Assessed as a low risk.

**What does it mean?** Reserves are critical components of a municipality's long-term sustainability. The Combined Reserves Indicator shows the value of the funds held in the reserves compared to a single year's operation including amortization expenses. This result indicates the Municipality has a healthy reserve, which is important to help address unexpected events or provide flexibility to address future projects. However, the capital reserve that comprises the combined reserve cannot be used for operating expenditures, thus the Municipality still has a vulnerability regarding addressing unexpected operating items.

## APPENDIX I – ADDITIONAL RESOURCES

### Nova Scotia Government's Open Data Portal

Nova Scotia Government's Open Data Portal officially launched on February 5, 2016. This portal provides access to various government data in a free, accessible, machine-readable format. The financial datasets currently published through the Nova Scotia Government's Open Data Portal are:

- Financial Condition Indicators by Municipality;
- Municipal Contributions to Roads
- Municipal Fiscal Statistics- Consolidated Revenues and Expenses by Municipality;
- Municipal Fiscal Statistics- Operating Fund Summary of Revenue and Expenses by Municipality;
- Municipal Fiscal Statistics- Operating Fund Expenses -10 Year Summary;
- Municipal Fiscal Statistics- Operating Fund Revenue -10 Year Summary;
- Municipal Property Tax Rates;
- Nova Scotia Power Grant In Lieu; and
- Uniform Assessment.

Open Data Portal Link: [data.novascotia.ca](http://data.novascotia.ca)

### Municipal Website

A municipality's website can be a helpful resource to access various financial information. Currently, most municipal websites provide:

- audited Financial Statements
- approved Operating Budget
- quarterly municipal expense report
- quarterly municipal hospitality expense report

Clark's Harbour Website: [clarksharbour.com](http://clarksharbour.com)
